Summary

- Bachelor's degree in Computer Science with over a year of internship experience as a full-stack developer.
- Experienced in designing, developing, testing, and maintaining software applications, with a focus on clean, optimized, and maintainable code.
- Collaborative and self-driven, experienced working effectively with cross-functional teams to consistently meet goals.
- Adopted the Software Development Lifecycle and Agile principles to guide development process.
- Continuously learned and explored emerging technologies, including framework libraries and AI tools, to expand technical proficiency.

Skills

Languages / Framework: JavaScript, Vue.js, HTML, CSS, Bootstrap, Python, Flask, SQLite, MySQL, Cypress

Tools: Microsoft Visual Studio, GitHub, Jira, Sentry, Chrome DevTools, Sequel Ace, Docker

Work Experience

Application Developer | CR18 Delivery Service, Jakarta, Indonesia

May 2025 – Present

- Created a point-of-sale system for retail business, improving operational efficiency and reducing human error.
- Implemented a user interface using JavaScript, HTML, CSS, Bootstrap, and Vue.js to replicate existing order forms, allowing easy adoption and a user-friendly interface.
- Developed RESTful APIs with Python and Flask to manage data stored in SQLite database, implemented user authentication and authorization to enhance security.
- Gathered user requirements for new features through collaboration with client, ensuing client centered solutions.
- Communicated technical challenges to the client in clear, non-technical terms to discuss alternative solutions effectively.

Full Stack Developer Intern | WhoPlusYou, Toronto, Canada

August 2023 – August 2024

- Learned new frameworks such as Vue.js and Laravel within a month to troubleshoot and resolve frontend and backend bugs.
- Owned an admin dashboard feature, from database schema design to user interface implementation, allowing non-technical users to manage records efficiently.
- Improved page load time through database optimization by condensing and simplifying queries, resulting in a fast and smoother user experience.
- Collaborated and communicated with QA engineers, senior developers, and product managers to deliver timely and high-quality solutions.
- Streamlined team development workflow using GitHub for version control, code reviews, and seamless integration.

Application Developer Intern | CIBC, Toronto, Canada

May 2022 – August 2022

- Increased familiarity with Typescript, Angular, Java, and Spring Boot to build a simple expense tracker.
- Experimented with Azure DevOps and Docker to understand version control workflows, enhance collaboration, and containerize applications
- Perform Agile processes such as Scrum through daily stand-up.

Education

Toronto Metropolitan University, Toronto, ON

June 2025

- **Major:** Computer Science Co-op, BSc (CGPA: 3.97/4.33)
- **Relevant Courses:** Data Structures, Algorithms, Web Systems Development, Web Application, Database Management, Software Engineering, Computer Network.
